 Muhammad Areeb Nadeem

Personal Profile

Motivated and detail-oriented Software Engineering undergraduate with hands-on experience in web development gained across aviation and airport-authority environments. Skilled in building, testing, and deploying client-facing web features, troubleshooting software and network issues, and collaborating with cross-functional teams to deliver reliable, user-focused solutions. Seeking to leverage a strong foundation in HTML, CSS, JavaScript, and PHP/MySQL, along with practical IT support experience, to contribute to a reputable organization while continuing to grow as a technical professional.

Education

Bachelor of Software Engineering (Final Year)

Indus University, Karachi, Pakistan | 2023 - 2026

Intermediate (pre-engineering)

Board of Intermediate Education, Karachi, Pakistan | 2021 - 2022

Matriculation

Board of Secondary Education, Karachi, Pakistan | 2019 - 2020

Professional Experience

Web Development Intern

Pakistan Airports Authority (PAA) | Karachi, Pakistan | Aug 11 - Sep 25, 2025

- Developed and maintained web applications for Pakistan Airports Authority to support efficient day-to-day management of airport services.
- Troubleshot software and network issues across authority systems, ensuring minimal disruption to ongoing airport operations.
- Identified and resolved bugs in existing web applications, improving reliability and consistency of service delivery.
- Supported testing and deployment of software updates and fixes to maintain smooth functioning of airport service platforms.
- Reviewed application workflows and web pages to identify usability and performance improvements.
- Coordinated with IT support staff to prioritize technical issues and ensure timely resolution of service requests.

Web Development Intern

Air Sial Limited | Karachi, Pakistan | Jul 21 - Aug 1, 2025

- Developed and implemented new features to add flight destinations within Air Sial's online booking system, supporting the airline's route expansion.
- Tested and deployed software updates, ensuring seamless integration with existing booking and reservation infrastructure.
- Assisted in monitoring and coordinating Flight Operations Services, supporting accurate scheduling and information flow.
- Worked closely with cross-functional teams to validate new booking features against operational requirements before go-live.
- Debugged and resolved issues in booking system features during development and testing cycles.
- Documented feature updates and testing outcomes to support smooth handover and future maintenance.

Web Development Intern

BIG Futur Digital | Remote | Jun 2024 - Aug 2024

- Developed and implemented software solutions tailored to client requirements, contributing to improved user satisfaction across multiple projects.
- Collaborated closely with a multidisciplinary team to identify, track, and remove software bugs throughout the development lifecycle.
- Wrote clean, efficient, and well-tested code for a variety of client web development projects.
- Participated in code reviews and iterative testing cycles to maintain consistent code quality across deliverables.

Projects

Final Year Project: AI-Based Airline Revenue Management & Dynamic Pricing System using Passenger Analytics

Collaborated with **Air Sial Limited**, one of Pakistan's leading domestic and international airlines, as official industry facilitator for the FYP "AI-Based Airline Revenue Management and Dynamic Pricing System Using Passenger Behavioral Analytics." Received technical guidance and industry insights from Air Sial's Flight Operations team throughout the project.

Worked under mentorship of Air Sial's Director of Operations, gaining practical industry perspective on revenue management and dynamic pricing. Applied real-world aviation context to design AI models for demand prediction, dynamic pricing, and customer loyalty analysis.

Formalized through a collaboration letter supporting an academia-industry partnership between Air Sial and Indus University's Department of Computing.
